EXECUTIVE PROFILE

Senior QA/QC professional with 16 years of experience across steel plants, heavy industrial, oil & gas, marine and infrastructure projects in EPC, PMC and client-side environments. Specialises in quality management system implementation, construction assurance, contractor quality governance, inspection planning, audits, NCR/CAPA management and quality documentation.

CURRENT LEADERSHIP SCOPE

Senior Manager – Project Quality (QA/QC), RSM India, assigned to the **JSW/JVML 5 MTPA** expansion project at Vijayanagar.

Coordinates 15 engineers across Civil, Mechanical and Electrical disciplines.

PROFESSIONAL VALUE

Brings together technical compliance, field quality assurance, controlled documentation and management reporting to establish consistent quality practices across multi-contractor industrial projects.

LEADERSHIP PILLARS

QUALITY GOVERMANCE

Consistent systems and controls

CONSTRUCTION ASSURANCE

Inspection readiness and compliance

PERFORMANCE IMPROVEMENT

Defect prevention and corrective action

QUALITY LEADERSHIP | TECHNICAL RIGOUR | PROJECT ASSURANCE

QUALITY SYSTEMS, DOCUMENTATION & KPIs

Structured governance. Right First Time execution. Continuous improvement.

QUALITY SYSTEMS & DOCUMENT DEVELOPMENT

Development and implementation of project quality systems and documentation to establish clear requirements, inspection controls, consistent records and effective quality governance across multiple contractors.

PROJECT QUALITY PLAN (PQP)

- Project quality framework and responsibilities
- Inspection and testing requirements
- Material management
- Document control and record management

QUALITY MANUAL

- Quality management framework
- Processes and procedures
- Contractor quality controls
- Audit arrangements
- Handover requirements

STANDARD OPERATING PROCEDURES (SOPs)

- Work procedures and method statements
- Inspection stages and acceptance criteria
- Field quality checklists
- Roles and responsibilities
- Quality records and reporting

INSPECTION & TEST PLANS (ITPs)

- Discipline-specific inspection plans
- Hold and witness points
- Testing and acceptance criteria
- Record requirements
- Compliance with codes, standards and specifications

KEY QUALITY PERFORMANCE INDICATORS (KPI FRAMEWORK)

A practical framework to monitor quality performance, identify trends, prevent recurring defects and drive continuous improvement across contractors and work packages.

01 RFWI FIRST-SUBMISSION ACCEPTANCE

- First-submission acceptance rate
- Rejection and resubmission trends
- Performance by contractor and discipline
- Support Right First Time (RFT) execution

02 DEFECT PREVENTION & WORKMANSHIP

- Defects identified during inspections
- Repeat defects and rework trends
- Defects normalised by inspection volume or work package
- Key defect categories and root causes

03 CONCRETE QUALITY (CUBE TEST PERFORMANCE)

- Cube pass rate by grade and contractor
- Failures by RMC plant and cement source
- Investigation and corrective action follow-up
- Trend analysis and improvement measures

04 NCR / CAPA EFFECTIVENESS

- Total open NCRs and ageing
- Closure within agreed timeframe
- Overdue actions and repeat NCRs
- Verification of corrective action effectiveness

05 INSPECTION & DOCUMENTATION COMPLIANCE

- Inspection-plan compliance
- Approved documents and materials before work
- Test records and calibration validity
- Quality record completeness

06 AUDIT & CONTINUOUS IMPROVEMENT

- Audit findings and action closure
- Repeat findings and contractor trends
- Implementation of preventive measures
- Training, awareness and continuous improvement initiatives

QUALITY MANAGEMENT APPROACH

FROM COMPLIANCE TO PREVENTION

Use inspection trends, NCR analysis, test results and audit findings to identify recurring quality risks, focus contractor interventions and verify corrective-action effectiveness across the project lifecycle.

Systematic Quality Planning | Proactive Defect Prevention | Collaborative Contractor Engagement | Continuous Improvement

CAREER PROGRESSION & PROJECT EXPERIENCE

From site engineering and quality inspection to project quality leadership

1

RSM INDIA
March 2022 – Present

Senior Manager – Project Quality (QA/QC)
JSW / JVML 5 MTPA Expansion Project, Vijayanagar
Project quality management, quality-system implementation, contractor quality governance, quality documentation, inspection oversight, audits, NCR/CAPA and multidisciplinary team coordination.

2

SIMPLEX INFRASTRUCTURES
November 2020 – March 2022

Deputy Manager – QA/QC
International Ship Repair Facility, Cochin Shipyard
Shiplift and transfer systems, quay walls, marine piling, deep foundations and coordination with client and consultant teams.

3

HEISCO
November 2016 – June 2020

QA/QC Engineer
KNPC Clean Fuel Project, Mina Abdulla Refinery
Greenfield and brownfield refinery works, equipment foundations, pipe racks, quality documentation and handover.

4

KENTZ ENGINEERS & CONSTRUCTORS
September 2015 – August 2016

QA/QC Engineer
Khurais Mega Project
EPC quality documentation, traceability, hold and witness points, site walkthroughs and RFI resolution.

5

NESMA & PARTNERS
July 2013 – June 2015

QC Inspector
SADARA Chemical Complex
Civil works, concrete pours, temperature checks and slump testing.

6

SUMITOMO CORPORATION
March 2013 – June 2013

QC Inspector
Tetra EP – Replace Mobile Radio System
Civil inspections, surveillance reporting and coordination with construction teams.

7

NESMA & PARTNERS
September 2012 – March 2013

QC Inspector
Jeddah Stormwater Drainage Program
Box culverts, pipe laying, manholes, backfilling and field-density testing.

8

DANIELI CONSTRUCTION
February 2012 – July 2012

QC Inspector
Hadeed – Long Products Expansion
Industrial civil works, heavy equipment foundations, anchor bolts, grouting and incoming material inspection.

9

KALLIYATH DEVELOPERS
April 2011 – December 2011

Civil Engineer
Reinforcement detailing review, bar bending schedules and fabrication coordination.

10

APK BUILDERS
June 2010 – April 2011

Site Engineer
Construction supervision, subcontractor coordination, specification compliance and material management.

CAREER PROGRESSION

Built a professional foundation in site execution and civil engineering, progressed through QC inspection and international EPC project environments, and advanced into project-level QA/QC management and mutlidisciplinary quality leadership.

INDUSTRY EXPOSURE

STEEL & HEAVY INDUSTRY | OIL & GAS / REFINERY | MARINE INFRASTRUCTURE | CHEMICAL COMPLEXES | CIVIL INFRASTRUCTURE | INDUSTRIAL CONSTRUCTION

EDUCATION, CERTIFICATIONS & RECOGNITION

Professional qualifications that strengthen quality leadership.

EDUCATION

B.Tech — Civil Engineering
Mahatma Gandhi University
2006 – 2010

PROFESSIONAL CERTIFICATIONS

ISO 9001:2015 Lead Auditor
CQI / IRCA
May 2025

Lean Six Sigma Yellow Belt
CSSC
March 2024

RECOGNITION

Certificate of Recognition for Excellence
FDH JV Management — Fluor, Daewoo, Hyundai
September 2017

INDUSTRY EXPOSURE

STEEL & HEAVY INDUSTRY | OIL & GAS / REFINERY | MARINE INFRASTRUCTURE | CHEMICAL COMPLEXES | CIVIL INFRASTRUCTURE | INDUSTRIAL CONSTRUCTION

TOOLS & QUALITY SYSTEMS

nPulse
Quality Module (RFWI, Inspection and Records)

MS Office
Documentation, Reporting and Data Management

Quality Dashboards
Tracking and Reporting

Stakeholder Coordination
Client, Consultants and Contractors

PROFESSIONAL VALUE PROPOSITION

QUALITY LEADERSHIP THAT CONNECTS SYSTEMS WITH SITE EXECUTION

Combining project quality management, multidisciplinary inspection coordination, contractor quality governance and structured documentation to strengthen quality assurance throughout the project lifecycle.

- Robust Quality Systems
- Effective Stakeholder Coordination
- Disciplined Documentation
- Continuous Improvement
